Professional Summary

IT Applications & Integrations Manager with experience leading enterprise system implementations, designing system integrations, automating business processes, and managing business-critical applications. Proven success developing API-driven solutions, coordinating cross-functional technology projects, and translating operational requirements into scalable technical solutions. Hands-on experience with application ownership, mentoring, and enterprise technology planning.

Technical Skills

Java, Spring Boot, Python, JavaScript/TypeScript • REST APIs, MS SQL Server, Postman • AWS, Microsoft 365, Low-Code Automation • Systems Integration, ERP Platforms, Workflow Automation, Technical Documentation, Agile/Kanban

Professional Experience

IT Applications & Integrations Manager

Housley Group – San Angelo, TX

August 2026 – Present

- Leading the end-to-end technical implementation of a multi-system ERP rollout, integrating job costing, payroll/HR, sales tax, and document management platforms.
- Designed and deployed custom automation scripts to streamline billing workflows, migrate data between systems, and reduce manual administrative effort.
- Developed and maintained API integrations to import customer data into legacy software for automated ticket creation and improved data accuracy.
- Serve as a primary SME and escalation resource for enterprise applications and process improvements.
- Mentor IT team members through technical guidance, knowledge transfer, and delegated ownership.

Network Administrator

Housley Group – Hybrid, TX

January 2023 – August 2026

- Awarded “Employee of the Month” for technical initiative and process improvements.
- Recognized with the “Up and Comer” Award for rapid skill growth, ownership, and cross-functional impact.
- Administered Microsoft 365 services including Teams, Exchange Online, SharePoint, and user account management.

Associate Software Engineer

Mphasis – Remote

July 2022 – January 2023

- Contributed to enterprise modernization efforts by updating and maintaining legacy codebases using Java.
- Collaborated within an Agile/Kanban environment to deliver enhancements, bug fixes, and code improvements.

Java Full Stack Developer Training

Quintrix Solutions – Remote

March 2022 – June 2022

- Hands-on development experience with Spring Boot, RESTful APIs, SQL databases, AWS services, and microservices architecture used to build and deploy full-stack applications with emphasis on backend services and data integration.
